

KLP® Combi Posts

*Specialising in Bollards
and Street Furniture*

KLP® Combi-posts for sheet-piling consist of an untreated pinewood post with a plastic top-piece made of KLP®.

The pinewood post is situated underwater and only the KLP® top-piece protrudes above the waterline. This prevents rotting caused by the interaction of air and water.

The top-piece can be worked in the same way as wood; i.e. it can be sawn, drilled, bolted, etc. Because they are maintenance free and have an extremely long lifespan, purchasing KLP® Combiposts ultimately leads to substantial cost reductions.

Convince yourself of all the advantages!

Reasons to use KLP Combi Posts:

- Maintenance free
- Durable (lifespan of more than 40 years!)
- Does not rot or splinter
- No leaching

KLP Combi Posts have been used:

- Sneek, NL
- Heerhugowaard, NL
- Berkel & Rodenrijs, NL

- Technical specifications / additional advice available.

Recycled plastics is *the* environmentally friendly solution

Increasing concerns about the environment, especially the controversial use of tropical hardwood and chemical treatments, has sparked a search for alternatives for waterside construction projects.

Recycled plastic is *the* environmentally friendly solution! Lankhorst Recycling Products supplies all the materials that modern marine construction engineers need to start work. including planks, sheet-piling, jetties and bridges. All these products are made completely from recycled plastic.
