

# KLP® Eco Deck

Durable and environmentally friendly!

KLP® is maintenance free, durable, quick & easy to clean, does not splinter and remains completely intact. KLP® is also ultra environmentally friendly. Because it is maintenance free and has an extremely long lifespan, purchasing KLP® Deck ultimately leads to substantial cost reductions. Convince yourself of all the advantages!

KLP® planks are also ideal for replacing (wooden) deck planks on existing bridges or jetties.

Pedestrian safety is one of the most important factors in designing walkways and jetties. KLP® Deck has a guaranteed non-slip surface. For even more grip, you can opt for KLP® Deck with a special anti-slip coating.

#### Reasons to use KLP Eco Deck:

- Environmentally friendly (does not leach!)
- Durable (lifespan longer than 40 years!)
- Does not rot or splinter
- Non-slip!

Leroux surface friction test according to NEN 2873

Surface	Dry	Wet
KLP® Deck	88%	66%
Bankirai Hardwood	77%	38%

#### Specifications

##### KLP® Deck

Size	Type	Spacing*
20 x 4,0 x 325 cm	flat	60 cm
15 x 5,0 x 325 cm	flat	70 cm

**Standard colour: black**

\*) 100 kg point load, maximum deflection L/250

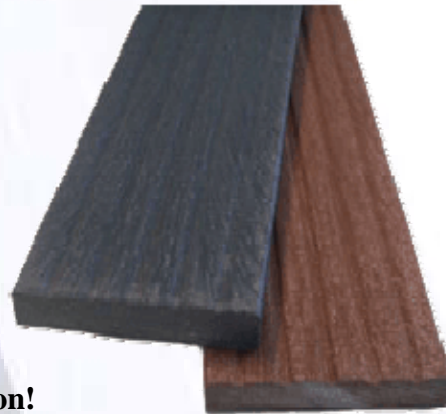

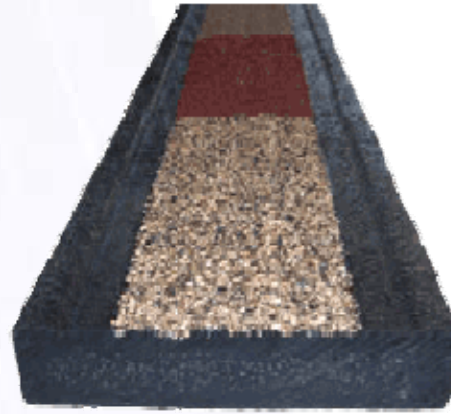

**KLP® Deck with anti-slip coating**

Standard colours black and brown; anti-slip coating in the following colours: "cycle path red", "footpath grey", "gravel beige" and "bridle path black."

**Recycled plastic is *the* environmentally friendly solution!**

Recycled plastic is *the* environmentally friendly solution! Increasing concerns about the environment, especially the controversial use of tropical hardwood and chemical treatments, has sparked a search for alternatives for waterside construction projects.

We supply all the materials that modern marine construction engineers need to start work including planks, sheet-piling, jetties and bridges. All these products are made completely from recycled plastic.
