

KLP® EcoGrid

*Specialising in Bollards
and Street Furniture*

Mud and sludge are things of the past! KLP® EcoGrid is ideal for soft ground. KLP® EcoGrid is a soil consolidation product made from recycled polythene and is the solution to soil erosion.

KLP® EcoGrid was developed together with agricultural specialists in order to produce the most effective system possible. This means that, with KLP® Eco Grid, you know you have the best product on the market today.

KLP® EcoGrid is available in various designs. In this way, there is always an Eco Grid that optimally meets local conditions and requirements.

Special cases

- Durable
- Flexible
- High load-bearing capacity
- Easy to lay

Ideal for every situation

KLP® EcoGrid is the soil consolidation system for the agricultural sector. KLP® EcoGrid can, for example, be used for/on:

- Storage yards
- Poultry/livestock farms
- Pastures
- Driveways and paths
- Manage & Show rings

Specifications

	Size	Height
E 50	33,3 x 33,3 cm	5,0 cm
S 50	33,3 x 33,3 cm	5,0 cm
EL30	33,3,x, 33,3 cm	3,0 cm

Standard colour is black.
Also available as solid paving
stones.

Properties

- Soil consolidation
- Anti-slip
- Does not shear
- Weatherproof and environmentally neutral.
- High load-bearing capacity
- Elastic
- Durable drainage
- Subsoil stabilisation
- Ammonia resistant
- Frost-proof and UV-resistant
- Can be filled with soil, gravel or grass

Reasons to use KLP Ecogrid:

- No quagmires
- Reduced skidding hazards due to firm ground
- Lightweight and easy to lay
- Reduces costs
- Can be driven on
- TÜV certified system

Quick and easy to lay

1. Fit
2. Push back
3. Connect
4. Click
5. Finished!

KLP® Eco Grid has a patented click system, which makes it easy to lay. We have also taken a large amount of the laying work off your hands. In our factory, eco grid tiles are pre-assembled on easy to lay sheets (that hold 12 tiles). This enables you to lay 1.33 m² in a single operation.

Because of the “open” structure of the tiles, grass can grow through them and rainwater easily runs off (drainage). KLP® Eco Grid can also be filled with other materials such as gravel and soil.

Additional elements such as connecting pieces for slopes and bends make KLP® Eco Grid a flexible soil consolidation system.
