

Wall Canopy

Wall Canopy

This canopy provides a neat solution for employers with limited space options.

In anticipation of forthcoming legislation, we do not recommend installing the canopy over a doorway for use as a smoking area. The canopy can be neatly fitted to the sides of buildings to provide shelter from the rain for your employees and customers alike while they are smoking. The illustration shows our construction of a lightweight Aluminium frame with solid Polycarbonate panels. The modular design means we can easily add to the length to suit your available space.

We can also offer other models with curved roof panels for a more stylish finish.

Bollards2u combines the unique expertise, innovative approach and personal attention to detail. The result is the provision of powerful yet individual solutions for a wide range of security and street furniture applications.
