

Our pram shelters have been designed with strength and durability in mind, constructed from either high-grade aluminium extrusion BS EN 755 (1-9) that once powder coated BS EN ISO 9002 to your chosen RAL or BS colour will give a long lasting, low maintenance corrosion free finish that will never rust or mild steel, galvanised BS EN ISO 1461 or zinc plated EN12329 – 2000 Fe/Zn8/a/c and powder coated BS EN ISO 9002 to a colour of your choice.

## Elliptical Roof Pram Shelter

Roof glazing will be of bronze tinted UV stable polycarbonate and the side glazing of either UV stable polycarbonate or toughened safety glass, the choice is yours at no extra cost and top personalise the shelter your children's centre or school logo can be fitted to the inside of one of the glazing panels.

For overnight security we can fit a secure lockable door with either pin code or key lock to prevent anybody accessing the shelter out of hours. A hook and eye will be fitted to the shelter so that the door can be fixed open during opening times or to prevent the door slamming in windy conditions.

A full low level pram tether rail will be fitted to the inside of the shelter and provided with individual locks (each with three keys) so that parents can secure their pram inside the shelter with the option of a further 3/4 height pram tether rail and extra locks.

Over the next couple of pages I have listed a few different sizes of shelter for you to choose from which are accompanied with some visual images.

Our standard 3.2m x 2.2m shelter we generally say will accommodate approx 10 prams at ground level but this is not an exact science as buggies now come in different shapes and sizes. To fit more light weight pushchairs into this shelter we can fit a ¾ height tether rail so that folded pushchairs can hook over the tether rail increasing the capacity of this shelter dramatically.

Side guttering is incorporated into the roof section providing an anti vandal rain water discharge facility with downpipe fitted to either a water butt for the children to use during planting and outdoor play or it can be positioned to discharge towards a drain.

*Specialising in Bollards  
and Street Furniture*

Our 4.2m x 2.2m shelter will accommodate around 15 at ground level but then again with a  $\frac{3}{4}$  height tether rail you can utilise all of the shelter and not just the ground area.

Our 5.2m x 2.2m shelter will accommodate approximately 20 prams and again this can be increased with a  $\frac{3}{4}$  height tether rail.

If the area requires a hard standing (concrete base) then this needs to be 500mm larger in length and width than the shelter and 150mm in depth. I.e. a 4.2m x 2.2m shelter will require a concrete base of 4.7m x 2.7m.

As our shelters are constructed from high grade aluminium we can install into the present ground material submerging the legs into a concrete pocket and then top finishing with the present material (flags tarmac etc).

This facility has been priced for and is included within the quoted prices. If you require a new concrete base then this can be quoted for during a site survey.

This shelter was fitted with solid roof end panels which have since been modified to polycarbonate ends giving a more modern appearance.

# Pram Shelters

All side glazing is internally fixed so that no external fixings are on show giving a very domestic feel to the shelter whilst being far more secure and cost effective if a replacement panel is required due to breakage or vandalism

Specification
3.2m x 2.2m Canterbury Pram shelter including 10 single locks
4.2m x 2.2m Canterbury Pram shelter including 15 single locks
5.2m x 2.2m Canterbury Pram shelter including 20 single locks

Optional locking door for overnight security

We can powder coat to any colour you wish and as shown produce in multi colour combinations.

Our current lead times are 2-3 weeks and time on site would be a single day dependant on ground conditions and required ground works.

## Curved Back Steel Pram Shelter

As a cheaper option we have our steel shelter range that may not be as pleasing to the eye as our premium Aluminium range but the Dewsbury steel Pram shelter offers a cost effective pram storage solution. You will

notice that the side glazing is fixed to the external frame work as with all steel structures and fixed by way of text screws. A locking door with slide bolt is fitted to the shelter for overnight security.

The cycle hoops shown inside the shelter are replaced with a single low level tether rail and supply with individual locks for mum/dad to secure their pram to the shelter.

Specification
4.1m x 2.7m Pram Shelter
6.1m x 2.7m Pram Shelter

I hope the information is comprehensive enough and if you don't mind I will call you in a couple of days to ensure you have all the information required and answer any questions you may have. As part of our customer service we offer a free no obligation site survey whereby we can give advice on positioning of the shelter and ensure that all health and safety and DDA access regulations are adhered to. If you would like to take advantage of this service please contact me on any of the numbers below.
